03.

INTERACTIONS

Sign In Flow

Click Login button to navigate to the Home feed.

Event Discovery

Click any Event Card to open detailed event view.

Registration Action

Click Register button to submit details and reserve a spot.

Confirmation

System auto-navigates to the Success Screen after server validation.

Global Navigation

Back buttons allow seamless regression between nested views.

04.

ANIMATIONS

Smart Animate

Used for smooth element morphing between screen states.

Slide Transition

Horizontal slide (300ms) for moving deeper into the flow.

Fade Transition

Used for overlaying registration success modal components.

Interactive States

Subtle scaling and glow effects on button hover/active.

Loading System

Circular spinner logic implemented for API fetching states.

USER TESTING

5 Users

PARTICIPANTS

SUCCESS METRICS

Task Completion Rate

90%

CRITICAL FEEDBACK

- Event search visibility was low; users struggled to find specific dates.
- Main CTA buttons were perceived as small on smaller device mockups.
- Navigation labels in the tab bar were slightly ambiguous.

DESIGN IMPROVEMENTS

- Increased primary CTA height by 8px and added drop shadow.
- Re-structured Event Card hierarchy to prioritize Date and Location.
- Enhanced navigation labels for better semantic clarity.

"The final prototype achieved a seamless bridge between university event data and student social life."

— FINAL OUTCOME SUMMARY

9.0

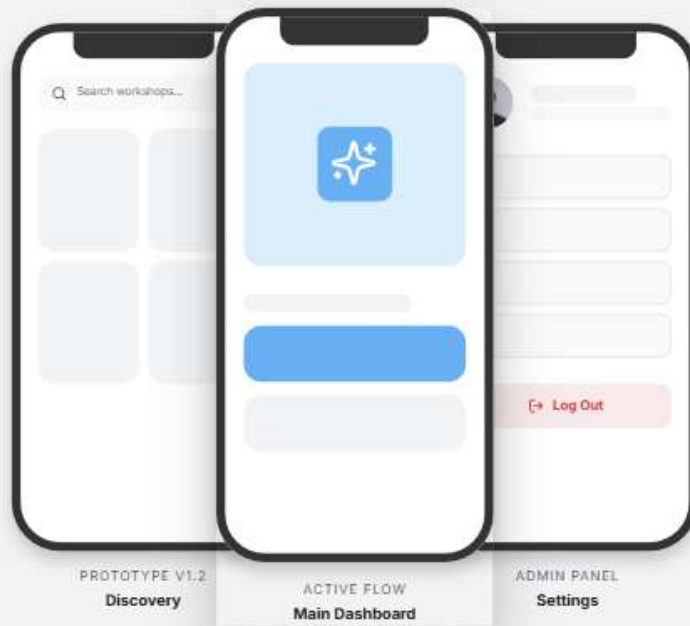

Easy Navigation

Positive Feedback

Minimalist UI

06.

FINAL PROTOTYPE

High Fidelity Design Artifact

A comprehensive mobile experience designed for the modern campus. The interactive prototype demonstrates full user flows, error states, and registration logic ready for development handoff.
